

Shaft Structures

KLEEMANN™
Your 1st Choice in Lifts

KLEEMANN Shaft Structures

KLEEMANN offers steel or aluminum constructions, self supported or fitted onto the wall, for lift installations where concrete shaft is not available. They can be easily installed indoor or outdoor and they can support all KLEEMANN lift products. KLEEMANN Shaft Structures are designed by expert engineers, and can be fully customized to your architectural needs, with a variety of aesthetic choices for both structure and shaft cladding.

Features / Advantages

- Maximum rated load up to 5000Kg
- Minimum Ex-works delivery period of 8 weeks (Pre assemble in our premises is included)
- Several options for shaft cladding: glass or steel sheet panels (galvanized or prime painted or skin plate)
- Painted according to your (RAL) color preference (available for the steel structure and the shaft cladding)
- Highly aesthetic result
- Fully detailed job specific installation manual with drawings available
- Safe and quick installation
- Kleemann quality and guarantee
